Each plant, each vine, each tree and shrub
Has a nature all its own
To look its best
To do its best
It must be rightly grown.

*You are welcome, at all times, to drive
through our nurseries.*

FOR E W O R D

This spring finds us beginning our thirty-fifth year in business. We are proud of the part we have played during these years in making Cincinnati one of the most beautiful cities in America, and we are happy to have so many friends, not only in this immediate area, but throughout the middle west. We will strive to constantly increase this circle of friends by furnishing better service and plant materials.

Most of the plants listed are grown in our 250 acres of nurseries. Since freshly dug plants are superior, we maintain no storage cellar. All plants have been frequently transplanted, pruned, sprayed, fertilized and cultivated. The high altitude and heavy soil of our nurseries, together with our present program of drainage, soil improvement and irrigation, makes it possible for us to supply you with high quality nursery stock.

All ornamental plants listed comprise only those varieties we have found from our years of experience to be adaptable to our soil and climate, and will fill any need for landscaping in this area. However, we have many of the rarer species grown in large specimens of sizes not here listed. Call or write for quotations if interested.

LANDSCAPE SERVICE

Today we have one of the most complete landscape organizations in the country. We have the technical personnel and equipment to efficiently handle any type of landscape work. A staff of experienced representatives are at your disposal to give advice and help you plan; a large force of skilled landscape and nursery workers and service trucks are available for your needs. Our services include the following.

Without obligation, you may avail yourself of the service of one of our experts to give you advice and price quotations on any of the above work.

We have available many large specimens of the better varieties of shade trees, evergreens and shrubs. With our modern method of tree moving, it is now possible for us to move and successfully transplant large specimens almost any time of the year, at a cost commensurate with the immediate effect and abundant shade you will receive. Every large tree we furnish and plant is guaranteed to grow. We also offer you the service of experienced men to advise you in the selection and location of these specimens.

Numbers following variety names indicate height in feet at maturity.

GARDEN STORE

For the many people who prefer to do their own gardening, and who like to select their plants to take home and plant themselves, we now have available, "Natorp's Garden Store", located on Montgomery Road in Kenwood.

Here you can park in our large convenient lot, look around the huge sales area and display grounds and choose those plants that may interest you. Attendants will be at your service to help you make selections and answer your questions. A full line of garden tools, furniture, spray material and fertilizers, flowering plants and vegetable plants in season, seeds and garden accessories are also on sale. Stop and visit with us when out driving. You will find it a pleasant experience.

The "Garden Store" is open daily, including Sundays, from 9:30 to 5:30. Closed from December 25th to March 15th.

We maintain, also, a similar sales ground at our main office, 4400 Reading Road. Open from 8 to 5. Closed Sundays.

EVERGREENS

Evergreens form an essential part in any treatment of the home and its grounds. They look effective 365 days of the year, retaining their foliage throughout the winter. They are useful and attractive in foundation plantings, in groups or masses, as specimen plants, and to accentuate points in formal gardens. Our Evergreen collection is one of the largest and most complete in the middle west. Frequent transplanting in our nurseries, especially in our heavy clay soil, develops a good root system. All Evergreens are sheared and staked from small plants up and developed into well shaped specimen plants. The best time to plant Evergreens is in the spring from March to May, and in the fall from August to October. However, when carefully handled, Natorp Evergreens can be planted any time during the year. Prices include balling and burlapping.

BROAD LEAVED EVERGREENS

Under "Broad Leaved Evergreens" are classed all shrubs retaining their foliage during the winter months. For city planting, in many instances, they have given better results than the Coniferous Evergreens. Many varieties of Evergreens lend beauty both with bloom and luxuriant evergreen foliage. Most of these broad leaved sorts prefer protected locations. Prices include balling and burlapping, unless otherwise noted.

AZALEA

For best results, "Azaleas" should be planted in well prepared ground. Since they are acid loving plants, it is well to use a liberal amount of peat moss and leaf mold. Good treatment will produce the happiest results for you. In order to keep the Azaleas together as a group, we have included the deciduous type among the following.

DECIDUOUS SHADE TREES

Trees occupy, by far, the greatest place in our landscape. Everyone knows the value of shade trees and they may be regarded as a permanent investment. We could not do without them. Select them with care. For permanency choose the hardwood types, although they grow a little slower.

In addition to the trees listed, we have available many large specimens of the better varieties of shade trees, evergreens and shrubs. With our modern methods of tree moving, it is now possible for us to move and successfully transplant large specimens almost any time of the year at a cost commensurate with the immediate effect and abundant shade you will receive. Every large tree we furnish and plant is guaranteed to grow. We offer you, also, the service of experienced men to advise you in the selection and location of these specimen trees.

The caliper measurement is taken at a point six inches above the ground. Prices include balling and burlapping, unless otherwise noted.

DECIDUOUSSHRUBS

The judicious planting of shrubs adds greatly to the beauty and value of property, and contributes a wealth of pleasure and interest to the home. A good shrub collection will present the greatest variety of color throughout the season, both in flower and foliage. Even in winter it is attractive in appearance from the gracefulness of its stems and branches, and from the color of its bark. Irregular massing is the most picturesque method of shrub planting, and a selection of varieties for every requirement can be made from the following list.

ACANTHOPanax sieboldianus (pentaphyllus) (Five-Leaf Aralia) 7'
Graceful, arching habit, good foliage. Splendid for banks. Stand city conditions.

VINES

&

GROUND COVER

Hardy vines and climbers add greatly to the beautification of the home by covering banks and bare spots and giving shade and fragrance to the pergola and veranda. There is a great diversity of habit and variety among the vines. Some vines are best suited for shade, others for flowers. Many of them require some support but others, such as Boston Ivy and English Ivy, are self supporting to brick, stone, or other materials of similar texture. These are very useful for softening the rough corners of the house.

FRUIT TREES

The home orchard is coming back into popular favor, for who can resist the beautiful show of blossoms in the spring and the joys of luscious fruit in the fall.

We carry the choicest variety of fruits which have proven successful growers in this section.

Some fruit trees are available in large sizes. These trees are heavy branched and beautifully shaped. They will save you many years of waiting for blossom, shade and fruit. They are from five to seven years old and are excellent plants for specimen planting.
